

SABARINATHAN S

Senior Software Developer | .NET Backend Developer | C# | ASP.NET Core | SQL Server | Microservices

Vedaranyam, Tamil Nadu | +91 7373931899 | sabaricontactmail@gmail.com | linkedin.com/in/sabaridev

PROFESSIONAL SUMMARY

Senior .NET Backend Developer with 3+ years of experience designing, developing, and optimizing enterprise-grade applications using C#, .NET Framework, ASP.NET Core, ASP.NET Web Forms, ASP.NET Web API, RESTful APIs, SQL Server, Entity Framework Core, Dapper, LINQ, and Microservices architecture. Proven track record delivering high-performance backend solutions across Healthcare and FMCG domains, including API integration, SQL query optimization, database performance tuning, and legacy application modernization. Skilled in Object-Oriented Programming (OOP), SOLID Principles, Repository Pattern, Dependency Injection, Agile/Scrum, Git, and Azure DevOps. Recognized for strong root-cause analysis, production support, and cross-functional collaboration that drive application stability and measurable business value.

TECHNICAL SKILLS

Backend: C#, .NET Framework, ASP.NET Core, ASP.NET Web Forms, ASP.NET Web API, RESTful APIs, Dapper, LINQ, Microservices

Database: SQL Server, T-SQL, Entity Framework Core, Stored Procedures, Views & Functions, Query Optimization, Database Performance Tuning

Frontend: Angular, HTML5, CSS3, JavaScript, jQuery, Bootstrap

DevOps / Tools: Azure DevOps, Git, Visual Studio, Postman, IIS, SQL Server Management Studio (SSMS), CI/CD

Software Engineering: OOP, SOLID Principles, Repository Pattern, Dependency Injection, Agile/Scrum, SDLC, Production Support & RCA

PROFESSIONAL EXPERIENCE

Senior Software Developer

Apr 2026 – Present

SANeForce Pvt. Ltd. | Chennai, Tamil Nadu

Project: Sales Force Automation – FMCG Enterprise Platform

- Develop and maintain enterprise FMCG applications using C#, ASP.NET Web Forms, .NET Framework, SQL Server, JavaScript, and jQuery, supporting business-critical Sales Force Automation operations.
- Own the Warehouse, Inventory, Batch Management, Sales, and Distribution modules for a large-scale FMCG sales automation platform, including enterprise reporting solutions used in day-to-day business operations.
- Design, develop, and optimize SQL Server stored procedures, views, functions, and complex T-SQL queries to improve application performance and reporting efficiency.
- Lead performance tuning of reports and database queries, improving data accuracy and reducing application response times for high-volume FMCG workflows.
- Analyze production issues end-to-end, perform root cause analysis (RCA), and implement timely fixes to maintain application stability and uptime.
- Collaborate with cross-functional stakeholders to translate business requirements into scalable backend solutions within Agile delivery cycles.

Tech Stack: C#, .NET Framework, ASP.NET Web Forms, SQL Server, T-SQL, REST APIs, JavaScript, jQuery, HTML5, CSS3, Git, Azure DevOps, IIS

Software Developer

Dec 2022 – Mar 2026

Inlogic Technologies Pvt. Ltd. | Chennai, Tamil Nadu

- Designed and developed scalable backend applications for enterprise Healthcare products using C#, .NET Framework, ASP.NET Core, SQL Server, Entity Framework Core, Dapper, and LINQ.
- Drove modernization of legacy monolithic applications by re-architecting core modules into Microservices, improving scalability and maintainability.
- Applied Repository Pattern, Dependency Injection, and SOLID Principles to build maintainable, testable backend components; partnered with frontend developers using Angular, HTML5, CSS3, JavaScript, and Bootstrap.
- Owned the complete Software Development Life Cycle (SDLC) — requirement gathering, development, testing, deployment, production support, and defect resolution — using Azure DevOps, Git, and Postman.

Project: *MedTech Evolution – Practice Management System*

- Developed scalable backend modules and RESTful APIs for an enterprise healthcare practice management platform.
- Optimized SQL Server queries and stored procedures, and implemented Repository Pattern with modular backend architecture to improve maintainability.

Tech Stack: C#, ASP.NET Core, SQL Server, REST APIs, Dapper

Project: *Manage My Health – Patient Portal*

- Developed backend services and secure RESTful APIs supporting patient portal functionality, including UTC-based time-zone handling for users across multiple regions.
- Enhanced appointment scheduling modules and optimized backend business logic.

Tech Stack: ASP.NET Core, C#, SQL Server, REST APIs

Project: *PROMS – Patient Reported Outcome Measures System*

- Developed backend modules and RESTful APIs for secure healthcare survey management, implementing business validations and optimizing reporting workflows.
- Improved data retrieval performance while ensuring data integrity.

Tech Stack: C#, ASP.NET Core, SQL Server, REST APIs

ADDITIONAL

- Domain expertise: 3+ years delivering enterprise applications across Healthcare and FMCG domains, spanning practice management, patient portals, survey systems, and sales force automation.
- Performance focus: Consistent track record of SQL Server query tuning, stored procedure optimization, and database performance analysis to improve reporting and application response times.
- Engineering practices: Applies Repository Pattern, Dependency Injection, and SOLID Principles to build maintainable, testable backend components.
- Delivery ownership: Full-cycle SDLC ownership from requirement gathering through production support, using Agile/Scrum, Git, and Azure DevOps.

EDUCATION

Bachelor of Engineering (B.E.) – Electronics and Communication Engineering

Nehru Institute of Technology, Coimbatore, Tamil Nadu
